SECTION-01
MATH

Total Time**: 80 Minutes**
Number of questions**: 45**

1. A water purification company has patented a unique process to remove contaminants from a container of water at the same time that more contaminated water is added for purification. The percent of contaminated material in the container of water being purified can be modelled by the function $c(t) = (0.9)^t$, where t is the time in seconds. The number of liters of water in the container can be modelled by the function $f(t) = 650 + 300t$. What will be the function that represents the number of liters of contaminated material in the container at any time t?

   A) $(650 + 300(0.9^t))$
   B) $0.9^t (650 + 300t)$
   C) $(650 + 300t + (0.9^t))$
   D) $(950 + (0.9^t))$

2. A country projects that the average amount of money, in trillion of rupees, that it will collect in taxes from each taxpayer over the next 50 years can be modelled by the function $A(t) = 285 + 2t$, where t is the number of years from now. It also projects that the number of taxpayers over the next 50 years can be modelled by the function $C(t) = 15(1.01)^t$. What will be the function that represents the amount of money in trillion of rupees that the country expects to collect in taxes over the next 50 years?

   A) $4275 + 30(1.01)^t$
   B) $4275(1.01)^t + 30(1.01)^t$
   C) $4275(1.01)^t + 30t(1.01)^t$
   D) $4275(1.01)^t + 30t$

3. There is a right-angled triangle of sides of lengths 3 cm, 4 cm and 5 cm respectively. There is also a square of side 6 cm. Which of the following statements is true?

   A) Area of the triangle is 6 cm^2 more than the area of the square.
   B) Perimeter of the triangle is equal to the area of the square.
   C) Area of the triangle is 10 cm^2 less than the perimeter of the square.
   D) Perimeter of the triangle is 12 cm less than the perimeter of the square.

4. Dreamworld Resort, Karachi opened the Hotel Destination at Monora Beach. Hotel Destination advertises using the slogan "350 days of sun every year" for the international tourists. According to the advert, what is the smallest number of days a tourist has to stay at the hotel in 2023 to be certain of having two consecutive days of sun?

   A) 17
   B) 21
   C) 31
   D) 32

5. Three friends Pervaiz, Haziq and Waqar are talking about an art exhibition, that they are about to visit. Following are the conversation between these three friends.

   Pervaiz : There are at least four paintings from Sadequain at the exhibition.

   Haziq: No, they have at most three paintings from Sadequain.

   Waqar: There is at least one of his paintings.

   It turned out that only one of them was right. How many of Sadeqain's painting are there at the exhibition?

   A) 0
   B) 1
   C) 2
   D) 3

6. There is a pool of length 50 meters and an unknown width. Sameer and Iqbal decide to have a race. Sameer runs around the perimeter of the pool while Iqbal swims lengths of the pool. Sameer runs three times faster than Iqbal swims. Iqbal swam six lengths of the pool in the same time Sameer ran around the pool five times. How wide is the pool?

   A) 31 meters
   B) 30 meters
   C) 40 meters
   D) 45 meters

7. Two buildings are located on one street at a distance of 250 meters from each other. There are 100 students living in the first building, and there are 150 students living in the second building. Where should a bus stop be built so that the total distance that all residents of both buildings have to walk from this bus stop to their buildings would be the least possible?

   A) anywhere between the buildings.
   B) 100 meters from the second building.
   C) in front of the first building.
   D) in front of the second building.

8. Diana draws a rectangular grid of 12 squares on squared paper. Some of the squares are filled by black dots. In each other square she writes the number of dotted squares that share a side with it. The figure shows an example. Now she does the same in a rectangular grid with 2018 squares. What is the maximum value that she can obtain as the result of the sum of all the numbers in the grid?

1	•	2	1
0	3	•	•
1	•	2	1

   A) 2016
   B) 2018
   C) 3025
   D) 3027

IBA GRADS
Gateway to your desired future

9. An open-topped box can be made from a sheet of aluminum measuring 50 cm by 30 cm by cutting congruent squares from the four corners and folding up the sides. Find a polynomial function to represent the volume of this box.

A) $x(25 - x)(15 - x)$
B) $4(25 - x)(15 - x)$
C) $(50 - 2x)(30 - 2x)$
D) $(50x - 2x^2)(30 - 2x)$

10. During a race in the Sportsman category of racing, it is common for cars different performance potentials to race against each other while using a handicap system. Suppose the distance, d_1, in meters, that the faster car travels is given by $d_1(t) = 10t^2$, where t is the time, in seconds, after the driver starts. The distance, d_2 in meters, that slower car travels is given by $d_2(t) = 5(t + 2)^2$, where t is the time, in seconds, after the driver of the faster car starts. What will be the function, that gives the relative distance between the cars over time?

A) $5t^2 + 20t - 20$
B) $5t^2 - 20t - 20$
C) $10t^2 - 20t - 20$
D) $t^2 - 20t - 20$

11. A local hockey team owner would like to boost support at the games. He decides to reduce the ticket prices, T, in dollars according to the function $T(g) = 10 - 0.1g$, where g represents the games played so far in the season. In order to further increase fan support, he decides to randomly give away noisemakers. The number, N, in hundreds, of noisemakers can be modelled by the function $N(g) = 2 - 0.05g$. The community fan base is small but the owner notices that since the incentives were put in place, attendance, A, in hundreds, can be modelled by $A(g) = 8 + 0.2g$. What will be the revenue from ticket sales in hundreds of dollars?

A) $80 - 1.2g - 0.02g^2$
B) $80 + 1.2g - 0.02g^2$
C) $\frac{2-05g}{8+0.2g}$
D) $(2 - 0.05g)(8 + 0.2g)$

12. The lengths of the two sides of the triangle are 5 and 2, and the length of third side is an odd integer number. Find the length of the third side.

A) 5
B) 4
C) 7
D) 9

13. In a family, each child has at least two brothers and at least one sister. What is the smallest possible number of children in this family?

A) 3
B) 4
C) 5
D) 6

14. What is the sum of 25% of 2022 and 2022% of 25?

A) 2022
B) 1010
C) 2020
D) 1011

15. There are 105 numbers written in a row: 1,2,2,3,3,3,4,4,4,4,5,5,5,5,5,... (Each number n is written exactly n times). How many of these numbers are divisible by 3?

A) 12
B) 21
C) 30
D) 45

16. Mujahid keeps dogs, cows, cats and hens as pets. He tells Nahid that he has 24 pets in total and that $\frac{1}{8}$ of them are dogs, $\frac{3}{4}$ are not cows and $\frac{2}{3}$ are not cats. How many hens does Mujahid keep?

A) 8
B) 5
C) 6
D) 7

17. A train is made up of 18 carriages. There are 700 passengers travelling on the train. In any block of five adjacent carriages, there are 199 passengers in total. How many passengers are in the middle two carriages of the train?

A) 70
B) 77
C) 78
D) 96

18. Jaffer has 12 marbles. 1/4 of these 12 marbles are large. The rest of these 12 marbles are small. Each large marble has a weight of 70 grams. Each small marble has a weight of 50 grams. The total weight of the 12 marbles is:

A) 660 grams
B) 450 grams
C) 210 grams
D) 650 grams

19. Jamil makes a drink by mixing 1 part of orange squash with 9 parts of water. He uses 750 milliliters of orange squash. Jamil is going to put the drink he has mixed into 1-liter bottles. The greatest number of 1-liter bottles that Jamil can completely fill is:

A) 8
B) 7
C) 9
D) 10

20. If $\frac{a}{b} = \frac{2}{5}$ and $\frac{b}{c} = \frac{3}{4}$, find the value of a : b : c.

A) 6 : 12 : 15
B) 5 : 9 : 15
C) 6 : 15 :20
D) 1 : 15 : 20

21. Liquid A and liquid B are mixed to make liquid C. Liquid A has a density of 70 kg/m^3. Liquid A has a mass of 1400 kg. Liquid B has a density of 280 kg/m^3. Liquid B has a volume of 30 m^3. What will be density of liquid C?

A) 980 kg/m^3
B) 280 kg/m^3
C) 350 kg/m^3
D) 196 kg/m^3

22. Sara plays two games against Maryam. In each game, Sara could win, draw or lose. In each game they play, the probability that Sara will win against Maryam is 0.3 the probability that Sara will draw against Maryam is 0.1. Find out the probability that Sara will win exactly one of the two games against Maryam.

A) 0.42
B) 0.21
C) 0.18
D) 0.60

23. f and g are functions such that $f(x) = \frac{12}{\sqrt{x}}$ and $g(x) = 3(2x + 1)$. Find $f(g(1))$.

A) 3
B) 2
C) 4
D) 9

24. Shelley sells books. On Saturday she is going to give a free bookmark and a free dust cover with each book she sells. All the books are the same size. Shelley needs to buy the books marks and the dust covers. Bookmarks come in boxes. Each box contains 24 bookmarks. Dust covers come in packs. Each pack contains 36 dust covers. Shelley wants to have enough books marks and dust covers for 250 books. She buys exactly the same number of bookmarks and dust covers. Find the number of boxes of bookmarks and packs of dust covers.

A) 12 boxes and 10 packs
B) 12 boxes and 8 packs
C) 10 boxes and 8 packs
D) 12 boxes and 6 packs

25. There is enough space for 80 boxes of cornflakes in a stockroom. On Monday there are 65 boxes of cornflakes in the stockroom. On Tuesday 17 boxes of cornflakes are taken out of the stockroom. On Wednesday 29 boxes of cornflakes are put into the stockroom. How many more boxes of cornflakes can now be put into the stockroom?

A) 77
B) 3
C) 5
D) 7

26. There are 40 people at the meeting. Each person travelled to the meeting either by car or by train. 13 of the people are male. 10 females travelled by train. 8 males travelled by car. The total number of people who travelled by car is:

A) 16
B) 24
C) 25
D) 32

27. Sarah is going to cook a chicken. She uses this rule to find the cooking time.

cooking time = 20 minutes for each 0.5 kg + 10 minutes

The chicken has a weight of 2 kg. Sarah wants to finish cooking the chicken at 12:30 pm. At what time should Sarah start cooking the chicken?

A) 11:30
B) 11:20
C) 11:10
D) 11:00

28. Naveed's motorbike uses petrol. Naveed needs to mix oil with petrol. He mixes oil and petrol in the ratio 1:14 by volume. Naveed is going to ride his motorbike 3000 miles. Each 20 miles he rides uses 1 liter of oil and petrol mixture. A 500 ml bottle of oil costs 399 rupees. What is the total cost of the bottles of oil Naveed needs to buy.

A) Rs. 1500
B) Rs. 4940
C) Rs. 6440
D) Rs. 7980

29. Caroline is making some table decorations. Each decoration is made from a candle and a holder. Caroline buys some candles and some holders each in packs. There are 30 candles in a pack of candles. There are 18 holders in a pack of holders. Caroline buys exactly the same number of candles and holders. How many packs of candles does Caroline buy?

A) 1
B) 2
C) 3
D) 5

30. The table gives information about the number of bricks and the amount of mortar needed to build some areas of brick wall.

Area of brick wall (m^2)	Number of bricks	Amount of mortar (bags)
1	60	2.4
2	120	4.8
3	180	7.2
4	240	9.6
5	300	12

Nasim is going to build a brick wall. The area of the brick wall will be 8 m^2. Nasim has 450 bricks and 20 bags of mortar. How many more bricks are required to build this wall?

A) 540
B) 450
C) 30
D) 15

31. Sarah thinks of a positive number. She squares the number and adds 7. The result is 43. What number did she think of?

A) 4
B) 3
C) 6
D) 0

32. Simplify $\sqrt[3]{6.4 \times 10^{10}}$
A) 8000
B) 4000
C) 400
D) 40

33. The Syed family and the Lakhani family go to the Zoo. The Syed family buy 2 adult tickets and 3 child tickets. They pay Rs.2820 for the tickets. The Lakhani family buy 3 adult tickets and 5 child tickets. They pay Rs.4475 for the tickets. Find the cost of each child's ticket.

A) Rs.840
B) Rs. 895
C) Rs. 675
D) Rs. 490

34. Tanveer fills a carton with boxes. Each box is a cube of side 10 cm. The carton in a cuboid with length 60cm, width 50 cm and height 30 cm. The number of boxes Tanveer needs to fill one carton completely is:

A) 81
B) 85
C) 90
D) 100

35. Here are the ingredients needed to make 16 chocolate biscuits.

Chocolate biscuits
Makes 16 chocolate biscuits
100 g of butter
50 g of caster sugar
120 g of flour
15 g of cocoa

But Sara has

250 g of butter
300 g of caster sugar
600 g of flour
60 g of cocoa

Find out the greatest number of chocolate biscuits Sarah can make.

A) 15
B) 40
C) 16
D) 32

36. There are 200 counters in the bag. The counters are blue or red or yellow. 35 % of the counters are blue. 1/5 of the counters are red. Find out the number of yellow counters in the bag.

A) 55
B) 75
C) 88
D) 90

37. The distance from Caxby to Drone is 45 miles. The distance from Drone to Elton is 20 miles. Colin drives from Caxby to Drone. Then he drives from Drone to Elton. Colin drives from Caxby to Drone at an average speed of 30 mph. He drives from Drone to Elton at an average speed of 40 mph. What is Colin's average speed for the whole journey from Caxby to Elton?

A) 45 mph
B) 25 mph
C) 40 mph
D) 32.5 mph

38. Majid sells cans of drink in his shop. The cans of drink are delivered in boxes to the shop. There are 24 cans of drink in a box. On Tuesday morning, Majid had no cans of drink in the shop. On Tuesday afternoon, 18 boxes of cans of drink were delivered to the shop. When the shop closed on Tuesday, Majid had 15 cans of drink left. How many cans of drink did Majid sell on Tuesday?

A) 432
B) 408
C) 421
D) 417

39. The cost of electricity is increasing rapidly. According to the new tariff, a consumer has to Rs. 24 per unit for the first 130 units of electricity he uses and Rs. 130 per unit for the rest of the units of electricity he uses. A consumer uses 730 units of electricity. Find the total amount of money in rupees required to pay.

A) 78,000
B) 3120
C) 81120
D) 10920

40. An exam has two papers, Paper 1 and Paper 2. Paper 1 has 60 marks. Paper 2 has 90 marks. The pass mark is 2/3 of the total number of marks. Danish gets 70% of the marks for Paper 1. How many of the marks for Paper 2 must Danish get in order to get the pass mark?

A) 60
B) 70
C) 60
D) 58

41. Sami wants to make orange juice. He is going to buy boxes of oranges. There are 24 oranges in each box of oranges. 30 oranges make 2 liters of orange juice. Sami needs to buy enough oranges to make 8 liters of orange juice. Find the number of boxes of oranges that Sami needs to buy.

A) 3
B) 4
C) 5
D) 6

42. Kashif puts tins into small boxes and into large boxes. He puts 6 tins into each small box. He puts 20 tins into each large box. Kashif puts a total of 3000 tins into the boxes so that

Number of tins in small boxes: number of tins in large boxes = 2: 3

What percentage of the boxes are large?

A) 87 %
B) 65 %
C) 31 %
D) 30 %

43. Each exterior angle of a regular polygon is 15 degrees. Find the number of sides of this regular polygon.

A) 20
B) 24
C) 30
D) 32

44. Adnan, Lina and Riaz share an amount of money. Lina gets three times as much money as Riaz gets. Lina gets half as much money as Adnan gets. What fraction of the amount of money does Lina get?

A) 4/9
B) 2/9
C) 3/10
D) 3/5

45. Ahmed and Sadia work for a company that sells boxes of breakfast cereals. The company wants to have a special offer. Here is Ahmed's idea for the special offer.

Put 25 % more cereals into each box and do not change the price.

Here is Sadia's idea

Reduce the price and do not change the amount of cereal in each box

Sadia wants her idea to give the same value for money as Ahmed's idea. By what percentage does she need to reduce the price?

A) 15 %
B) 20 %
C) 30 %
D) 40 %

Vocabulary

1. Rambunctious
   A) Doldrums B) Lively C) Incapable D) Consummate

2. Disconcert
   A) Dismantle B) Disturbing C) Rattle D) Aspiring

3. Garrulous
   A) Reserve B) Undermine C) Talkative D) Indignant

4. Undermine
   A) Undercut something. B) Belittle authority C) Unsure D) Callous

5. Mendacious
   A) Threatening B) False C) Solution D) Profuse

6. Crass
   A) Type of vegetation B) Roman emperor C) Gullible D) Astonished

7. Periphery
   A) Marginal B) Wholesome C) Imagery D) Infuse

8. Meretricious
   A) Glib B) Autonomous C) Gregarious D) Callous

9. Luminous
   A) Shiny B) Student hailing from lums
   C) Obedient D) Zenith

10. Perspicacious
    A) Sweating profusely B) Incidental
    C) Astute D) Magnify

Poem Comprehension

In Xanadu did Kubla Khan
A stately pleasure-dome decree:
Where Alph, the sacred river, ran
Through caverns measureless to man
Down to a sunless sea
So twice five miles of fertile ground
With walls and towers were girdled round;
And there were gardens bright with sinuous rills,
Where blossomed many an incense-bearing tree;
And here were forests ancient as the hills,
Enfolding sunny spots of greenery.

But oh! that deep romantic chasm which slanted
Down the green hill athwart a cedarn cover!
A savage place! as holy and enchanted
As e'er beneath a waning moon was haunted
By woman wailing for her demon-lover!

And from this chasm, with ceaseless turmoil seething,
As if this earth in fast thick pants were breathing,
A mighty fountain momently was forced:
Amid whose swift half-intermitted burst
Huge fragments vaulted like rebounding hail,
Or chaffy grain beneath the thresher's flail:
And mid these dancing rocks at once and ever
It flung up momently the sacred river.
Five miles meandering with a mazy motion
Through wood and dale the sacred river ran,
Then reached the caverns measureless to man,
And sank in tumult to a lifeless ocean;
And 'mid this tumult Kubla heard from far
Ancestral voices prophesying war!
The shadow of the dome of pleasure
Floated midway on the waves;
Where was heard the mingled measure
From the fountain and the caves.
It was a miracle of rare device,
A sunny pleasure-dome with caves of ice!

A damsel with a dulcimer
In a vision once I saw:
It was an Abyssinian maid
And on her dulcimer she played,
Singing of Mount Abora
Could I revive within me
Her symphony and song,
To such a deep delight 't would win me,
That with music loud and long,
I would build that dome in air,
That sunny dome! those caves of ice!
And all who heard should see them there,
And all should cry, Beware! Beware!
His flashing eyes, his floating hair!
Weave a circle round him thrice,
And close your eyes with holy dread
For he on honey-dew hath fed,
And drunk the milk of Paradise.

11. What is the meaning of decree?
A) Order B) Mandate C) None of the above D) Both

12. What is the 'Alph' relating to?
A) Eastern river, alif B) Greek Word, alpha
C) None of the above D) Both of the above.

13. What the meaning of the word Sinuous?
A) Winding B) Straight C) Deep D) None of the above

14. Using what you read, what do you think about the physical aspects of the 2nd stanza?
A) Metaphoric B) Figurative C) Both D) Neither

15. What is the meaning of the word Meandering?
A) Unstructured and ostensibly aimless B) Lazy and frigid
C) Rapid and frenzy motion D) None of the above

16. "Milk of Paradise" denotes
A) Euphuism B) Naturalism C) Literal D) None of the above

17. What might the "damsel with the dulcimer" symbolize in the poem?
A) Artist B) Prisoner C) Lover D) King

18. What can be suitable meaning for the word 'dulcimer'?
A) It is a string based instrument
B) Stringed instrument played with hammers
C) Non string instrument
D) Non string instrument played by fingers

19. How many miles were walled in for the dome? Hint
A) 20 B) 6 C) 10 D) 12

20. What was the outstanding feature of the property?
A) A crystal tower B) A great cedar C) A giant ruby D) A fountain in a chasm

21. What instrument did the Abyssinian maid play?
A) Tambor B) Lyre C) Dulcimer D) Flute

22. What is the metrical description of this poem?
A) Iambic Tetrameter B) Iambic Pentameter
C) Trochaic Tetrameter D) Trochaic Pentameter

Poem Comprehension

I
Half a league, half a league,
Half a league onward,
All in the valley of Death
  Rode the six hundred.
"Forward, the Light Brigade!
Charge for the guns!" he said.
Into the valley of Death
  Rode the six hundred.

II
"Forward, the Light Brigade!"
Was there a man dismayed?
Not though the soldier knew
  Someone had blundered.
  Theirs not to make reply,
  Theirs not to reason why,
  Theirs but to do and die.
  Into the valley of Death
  Rode the six hundred.

III
Cannon to right of them,
Cannon to left of them,
Cannon in front of them
  Volleyed and thundered;
Stormed at with shot and shell,
Boldly they rode and well,
Into the jaws of Death,
Into the mouth of hell
  Rode the six hundred.

IV
Flashed all their sabres bare,
Flashed as they turned in air
Sabring the gunners there,
Charging an army, while
  All the world wondered.

IBA GRADS
Gateway to your desired future

Plunged in the battery-smoke
Right through the line they broke;
Cossack and Russian
Reeled from the sabre stroke
  Shattered and sundered.
Then they rode back, but not
  Not the six hundred.

V
Cannon to right of them,
Cannon to left of them,
Cannon behind them
  Volleyed and thundered;
Stormed at with shot and shell,
While horse and hero fell.
They that had fought so well
Came through the jaws of Death,
Back from the mouth of hell,
All that was left of them,
  Left of six hundred.

VI
When can their glory fade?
O the wild charge they made!
  All the world wondered.
Honour the charge they made!
Honour the Light Brigade,
  Noble six hundred!

23. What is the meaning of word Sabre?
A) Canon B) Gun C) Sword D) None of the above

24. According to the first stanza of "The Charge of the Light Brigade", how many British forces rode into the battle?
A) Five Hundred B) Six Hundred C) Four Hundred D) Two Hundred

25. What is depicted by the word Death?
A) Hyperbole B) Metaphor C) Personification D) None of the above

26. After reading the poem, what do you think of the army?
A) Patriotic B) Unquestionably obedient
C) Tragic and heroic D) All of the above

27. What does the light brigade mean?
A) Brigade bearing lights in daytime B) Brigade with relatively few meANS
C) Both of the above D) None of the above

28. What do you think was the reason for this tragedy?
A) Sabotage B) Blunder by the new men
C) both D) Neither

29. What is the tone and mood of The Charge of The Light Brigade?
A) Cowardice and pleasantness. B) Cowardice and sadness.
C) Heroic and pleasantness. D) Heroic and sadness.

30. What do you think happened to all the soldiers of The Light Brigade in the end?
A) They would win the battle. B) They would all die.
C) They would bring down hell. D) They would charge for the enemies' guns.

31. Based on Stanza 3, what were volleying and thundering?
A) Cannons. B) Cannon balls. C) Guns and rifles. D) Bullets.

IBA GRADS
Gateway to your desired future

32. Which word precedes "..... the six hundred" in the first three stanzas?
A) Code B) Mowed C) hoed D) Rode

33. "Stormed at with shot and shell" is an example of which language technique?
A) Alliteration B) Assonance C) Sibilance D) Haiku

34. What could the six stanzas represent?
A) Six canons B) Six hundred cavalry men
C) Six Generals D) Six miles that they rode

35. What is the timeline of this poem?

Cloze Test

Henry VIII's reign (1509-47) is usually 41._____ for the King's six wives and his legendary appetite. Infamously, he sent two of his wives, Anne Boleyn and Catherine Howard, to their deaths on the executioner's block at the Tower of London. But it is too easy to think of Henry VIII simply as the terrible monster of his bloated old age, shuffling painfully through Hampton Court Palace.
Henry was once a 42._____ little boy, adored and indulged until his elder brother Arthur's death placed a huge, unexpected burden on this second son. Two years later Henry's beloved mother Elizabeth of York died and his protective father Henry VII kept his precious heir 43._____and restricted. Many of his actions as king still resonate today. It could be said that in many ways Henry VIII 44._____our modern world. The break with Rome, the Reformation and the Dissolution of the Monasteries had profound and lasting effects. He was a paradox: a strong ruler, yet an anxious, 45._____ man. Henry was a 'golden youth' before a great series of losses and misadventures took their toll. Perhaps these go some way to explain his behavior and gradual decline.

41.
